

MEDICATIONS REVIEW GUIDE

(Internal use only)

Follow steps 1 through 6 to achieve a better understanding of patient compliance for each of their medications. Check the boxes as you discuss each category with your patient.

1. CONFIRM
the patient understands what each drug is being used for

- Medications
- OTC Medicines
- Vitamins / Supplements

2. CONFIRM
and review proper administration of medications (time of day, with/without food, dosing, intervals, etc.)

- Medications
- OTC Medicines
- Vitamins / Supplements

3. DISCUSS
any possible side effects the patient may be experiencing

- Medications
- OTC Medicines
- Vitamins / Supplements

4. REVIEW
the patient's history for Drug and Food Interactions and Allergies

- Drug Interactions
- Food Interactions
- Allergies

Notes: _____

5. Have the patient assign a 1- 5 compliance rating for each of their medications.

- 1. no compliance
- 2. rare compliance
- 3. some compliance
- 4. often compliant
- 5. always compliant

Notes: _____

6. DISCUSS
what is preventing the patient from being 100% compliant on their medications and what options are available to help them be more compliant. Mention any valuable services like:

- Delivery
- Packaging
- Compounding or Flavoring
- Simplify My Meds or Med Sync programs

NOTE - If you will be seeking reimbursement for any med review, call the insurance provider to inquire about their requirements prior to the med review. Each will be slightly different for reimbursement.
